

## **Visual Meditation on the Ascension**

- How does the image symbolize Jesus' "location" after the Ascension?
- Who are witnesses to the Ascension?
- What do you notice about those present? What are they doing? What do their poses and body language communicate?
- How is this image similar to or different from the scriptural account of the Ascension?
- What else does this image communicate to you about the Ascension, its significance for the artist, and for us today?
- What do you think was the most important element or aspect of the Ascension the artist was trying to communicate? How did he or she do that?
